## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/23/2006 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 4, 6-9, and 15-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over of Kaneko et al (6,107,360).

Kaneko et al disclose a UV sensitive resin (column 7, lines 44-63) for use in a process of making a semiconductor device similar to that instantly claimed wherein the (meth)acrylate having a (meth)acryloyl group may be selected from monomers including isobutyl (meth)acrylate, t-butyl acrylate, 2-ethylhexyl (meth)acrylate, ethoxyethoxyethyl (methacrylate), and isobornyl (meth)acrylate. These monomers may be employed alone or in a mixture. It would have been obvious to one of ordinary skill in the art to prepare the material of the reference choosing to employ a combination of two monomers, and employ ethoxyethoxyethyl

methacrylate (formula II) and a t-butyl methacrylate with reasonable expectation of achieving a material having excellent scratch resistance.
